

Portfolio Objective

These portfolios invest in a flexible combination of investments in the equity, bond, money and property markets. The underlying risk and return objectives of individual portfolios may vary as dictated by each portfolio's mandate and stated objective and strategy. These portfolios may be aggressively managed with assets being shifted between various markets and asset classes to reflect changing economic and market conditions and the manager is accorded a significant degree of discretion to maximize total returns over the long term.

Disclaimer

Unum Capital (Pty) Ltd is an Authorised Financial Services Provider, License No. 564. ETF's and shares are medium to long term investments. The exposures indicated in the graphs may differ from time to time due to market movements, fund limitations and the portfolio manager's discretion. All information is product related, and is not intended to address the circumstances of any Financial Service Provider's (FSP) client. In terms of the Financial Advisory and Intermediary Services Act, FSP's should not provide advice to investors without appropriate risk analysis and after a thorough examination of a particular client's financial situation. The value of the portfolio may go down as well as up and past performance is not indicative of future performance. Fluctuations or movements in exchange rates may cause the value of the underlying international investments to go up or down. A full risk disclosure is available from Unum Capital. The information above is based on a backtested model portfolio, and excludes brokerage costs from trading.

Notes

¹ Liquidity

The Fund / Instrument may be illiquid and redemptions and withdrawals may require a written notice period.

² Cumulative Trailing Returns

The Fund / Instrument performance over the specified time period. The annual return is calculated using: $(\text{Ending Value} / \text{Beginning Value}) - 1$ This illustrates the annual return of an investor who was invested for the entire year.

³ Monthly Total Returns

The Fund / Instrument's annual return is the percentage change in the value of an investment over a one-year, calendar period. This return includes all sources of income, such as dividends, interest, and capital gains, and is compounded over the period. The annual return is calculated using: $(\text{Ending Value} / \text{Beginning Value}) - 1$ This illustrates the annual return of an investor who was invested for the entire year.
